PROFESSIONAL SUMMARY

Engineer with 2 years of experience in Web Application Development and Microservices development.

Possess exceptional skills and have demonstrated my ability to efficiently collaborate with teams and handle clients globally in a professional manner.

Skilled in product development, support and deployment. Dynamic problem solver, Always eager to embrace new technologies to meet project requirements effectively.

SKILLS

Skills	Java, Spring Boot, Spring, Hibernate, HTML5, CSS3, JavaScript, React, Jenkins, Docker, Kubernetes, AWS, Git, Restful API, CI/CD, OOPS, Microservices, Web Application.
Tools	GitHub, Maven, Jira, Postman, Saviynt, Service Now, IntelliJ, Eclipse, VS Code.

WORK EXPERIENCE

Project Engineer Wipro Limited	July 2021 - Present Greater Noida, UP
--	--

- Working with XEROX globally, develop and migrate multiple web applications and microservices utilizing technologies such as Java, Spring Boot, Hibernate, Restful API, Microservices, AWS.
- Developed web application, Restful API microservices, enhancing application performance and enabling seamless integration with web clients for efficient business access.
- Identified underperformance areas in applications, automated and optimized business logic in both the service and DAO layer, resulting in a 20% reduction in application processing time and significantly improved performance.
- Successfully led the decommissioning and provision of 3+ applications by collaborating with business, ops teams and product manager for requirements and provide a solution with impact any business operations.

Intern Jio	June 2019 - June 2019 Jammu, J&K
----------------------	-------------------------------------

- Collaborate with the Core Architecture 4G/VOLTE team to design and implement algorithms and improve security.
- Learned algorithms used in LTE connections, and APIs to facilitate secure data transmission between client using Algorithm, Spring.

PROJECTS

Health Goal

Developed a real time web application for health goal include BMI calculator, calorie tracker with 600+ food items and weight training routine for week, month and custom time goal. Developed using Spring Boot, React, MySQL.

Symptom Based disease Prediction

Develop a symptom-based disease prediction web application to predict diseases based on symptoms and general information for patient. Utilize Machine learning algorithms. Developed using Python, React, MySQL.

EDUCATION

SRM Institute of Science and Technology Bachelor of Technology , Computer Science and Engineering	May 2017 - May 2021 Percentage 81.38
